

Welcoming | Involving | Evolving

Oxhey Early Years Centre

July 2016

## A Message from the Head of Centre

Welcome to Oxhey Early Years Centre.

We believe in children learning through play and having a high well-being - encouraged, supported and extended by highly qualified and experienced staff in a welcoming and stimulating environment.

Our vision is described by our 3 key words: WELCOMING, INVOLVING AND EVOLVING. We welcome children and families into our environment of creative and experiential learning where minds and bodies (young and old!) are active and inspired.

We welcome visitors to take a tour of the Centre and welcome over a hundred families to our Nursery and day care provisions every year.

We work closely with our onsite Children's Centre (Sunshine) and also welcome a wide range of other professionals, such as speech therapists and educational psychologists to work with us in supporting families.

Our children are highly involved in learning. Our practitioners are involved in helping all children reach their full potential and we also see our parents and carers as partners in their children's learning and welcome their involvement in the Centre.

We evolve and change through continuing professional training, responding to and leading on developments in how young children learn and develop. We continue to evolve practices and systems that nurture and enhance the well-being of children and families.

All our staff are happy to help so please ask if you need further information.

The office staff can help with queries about admissions, availability of places and invoices and funding.

If your child is with us then you can always approach your key person for information. Alternatively I or one of the senior leaders will be able to help. I am always happy to talk to parents so please approach me to make a time to talk, as needed.

We celebrate our strength at OEYC, as an outstanding Nursery and day care provider, but also always work on what we can do better - we strive to continue improving and evolving, meeting the needs of our community.

Kind regards,
